

DOSING SCHEDULES

Based on manufactures prescribing information and WHO guidelines

www.cervi.co.za

Cervarix (females only)

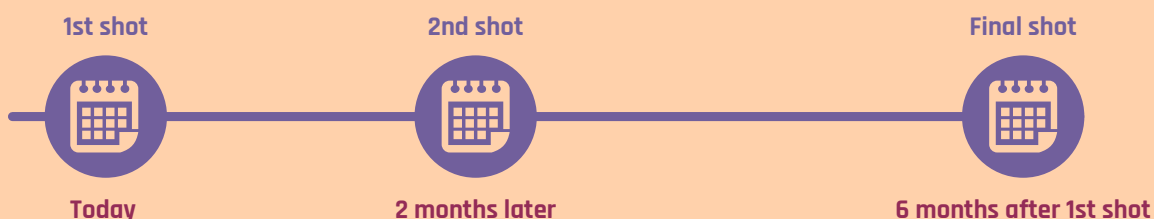

Table 1: Recommended dosing schedule for Cervarix

Age at the time of the first injection	Immunization and schedule
9 to (and including) 14 years*	Two doses each of 0.5 ml. The second dose given between 5 and 13 months after the first dose.
From 15 years to 26 years	Three doses each of 0.5 ml at 0, 1, 6 months**

* If the second vaccine dose is administered before the 5th month after the first dose, a third dose should always be administered.

** If flexibility in the vaccination schedule is necessary, the second dose can be administered between 1 month and 2.5 months after the first dose and the third dose between 5 and 12 months after the first dose.

Gardasil 4 (male and female patients 9 - 26 years)

Gardasil 9 (male and female)
